

Vasculitis Awareness Month *May 2016*

**JOIN.
SHARE.
SUPPORT.**

Vasculitis is a family of potentially life-threatening rare diseases linked by blood vessel inflammation and a dysregulated immune system.

Vasculitis affects people of all ages and both sexes.

Early diagnosis and effective treatment are critical to patients regaining their health and avoiding death.

Innovative research is needed to find a cause and a cure.

The Vasculitis Foundation supports and empowers patients through education, awareness and research.

*There is no known cause.
There is no cure.*

Anti-GBM disease	IgA vasculitis
Behcet's disease	(Henoch-Schönlein purpura)
Cogan's disease	Kawasaki disease
Cryoglobulinemic vasculitis	Hypocomplementemic urticarial
